Community Engagement Meeting: Proposed 10MW Solar Project in Arnprior

The Province of Ontario, through the Independent Electricity System Operator (IESO), is undertaking a competitive procurement for new electricity generation under its Long-Term Energy Procurement (LT2) process.

As part of this initiative, **Alectra Energy Solutions**, a subsidiary of Alectra Inc. and sister company to Alectra Utilities, has partnered with **Kruger Energy**, a leader in clean energy development. Through the Alectra Kruger Joint Venture, the partners are proposing a 10 megawatt (MW) solar energy generation facility at the Arnprior Airport.

If selected and approved, the project would help increase capacity on Ontario's electricity grid and support the province's long-term energy needs. Alectra Energy Solutions and Kruger Energy are 100% Canadian-owned companies that own and operate over 100 solar sites across Canada and the United States.

As the host municipality where the proposed project would be located, the Joint Venture wishes to notify you of the following in-person community engagement meeting.

Proposed Project Site

Arnprior Airport

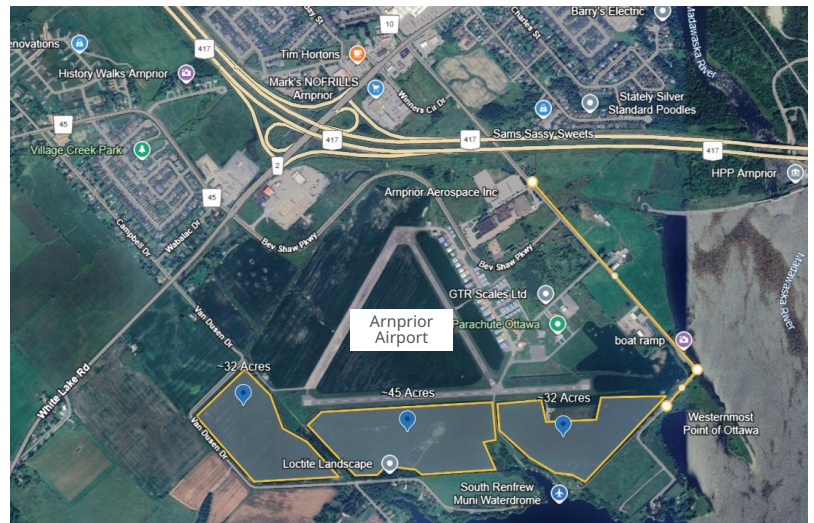

Community Engagement Meeting Details

Date: September 18, 2025

Time: 5:30pm to 7:30pm

Location:

Arnprior Library
21 Madawaska St
Arnprior, ON K7S 1R6

Contact
