Pay-As-You-Go Model

- Maintaining a strong commitment to the pay-as-you-go model will help address funding challenges
 - Need to annually increase contribution to reserves to fund future capital requirements
 - One of the key objectives of the pay-as-you-go model is debt management
- Debt management policy
 - Consider for appropriate projects

Debt Management

- 2025 annual debt payments are \$1.85M
 - Includes estimated 5 months NSC debenture
- Factors to consider (flexibility/sustainability)
 - Arnprior’s debt servicing ratio lowered to “moderate” under provincial standards (MMAH)
 - Annual repayment limits (ARL) set by province are an additional \$3.1M as per O.Reg 403/02
 - i.e. annual debt payments could increase from \$1.85M to \$3.1M without further ministry approval

Long Range Capital Forecast -20 Year Term

Financial Sustainability

- 2024-2027 Strategic Plan
 - Includes a key priority for financial sustainability with the aim to manage resources in a manner that ensures long-term stability and growth for the Town of Arnprior.
- Our 20 Year LRCF is a key financial planning tool for ensuring resources are in place to fund future infrastructure needs.

Background

- LRCF is a snapshot in time of known future Budget & Infrastructure pressures.
 - Significant reliance upon Town Master Plans and the Asset Management Plan
 - Subject to many factors, changes in priorities, legislation, pace of growth, inflation, data, etc.
- Set at a full 20-year timeframe given the nature and longevity of municipal infrastructure

Background

- LRCF is a dynamic tool which is reviewed and updated annual at budget time and is in “today’s dollars.”
- The Budget Binder identifies all additions and revisions from the previous LRCF under the LRCF tab.
 - Revisions are in orange (year or value)
 - Additions are in yellow

20 Year LRFCF

- For planning purposes, varying levels of accuracy exist depending on the timeframes in the LRFCF.

Timeframe	Accuracy
1-5 Years	Projects are generally set, limited change in value/year
6-10 Years	Probable to occur as forecasted, value/year may fluctuate somewhat
11-20 Years	Longer range and subject to adjustments as years draw closer
